Chemistry Summer Packet

For all students enrolled in Chemistry I Level One or Chemistry I Level Honors

There is a summer assignment associated with Chemistry Level One and Honors classes, which must be completed prior to the first day of school. The content reflects basic chemistry topics that you have encountered in your previous science classes and should have already mastered as a prerequisite to this year's Chemistry I course.

This background information will not be re-taught in your Chemistry class. You will be expected to review this content over the summer. During the first week of school, each Chemistry teacher will announce the day when your questions about any topic in this review packet will be answered. An assessment will then be administered on the packet material and the score earned will be included in your first quarter grade.

You will need to access the following materials to complete the summer work:

[Chemistry Chapter Outline Assignment](#)

[Chemistry Summer Packet](#)

[Chemistry Chapters 1 and 2](#)

[Chemistry Taking Notes From Your Textbook](#)

All materials are on the Amity website under the Links/Resources tab under science or at the link below:
