Public Plans – Investment Return Assumptions

Public pension plan investment return assumptions trend lower

- Directionally, investment return assumptions for public plans **have trended lower** over the last few years influenced by changes in economic and financial conditions.
- Plans have taken a **measured approach** to adopting lower investment return assumptions by working closely with the plan actuary to analyze the potential cost impact and reviewing other actuarial assumptions (e.g., project salary growth) that can serve to potential **offset costs** (higher contributions) associated with adopting lower investment return assumptions.
- It's important to note that investment earnings account for a majority of public pension financing. An investment return that is **set too low** can overstate liabilities and costs at the expense of current tax payers, while an investment rate **set too high** will understate liabilities at the expense of future taxpayers.

- A plan's actuary and its investment advisor can assist in establishing a **prudent investment policy** by predicting the cost of future benefits and working collaboratively with the plan sponsor to determine an asset allocation which, when combined with **adequate contributions**, can generate sufficient growth to meet pension obligations.

Asset Allocation Analysis

- **Asset allocation** is the primary determinant of long-term investment results.¹
- FIA utilizes **mean-variance optimization**, which is augmented by **Monte Carlo simulation**, as the basis for asset allocation analysis. These exercises are conducted via a software package called Stylus.
- The analysis relies heavily on data input. FIA develops **risk and return assumptions** for each major asset class on an annual basis. The annual process is as follows:
 - ✓ The FIA Investment Committee discusses the current economic landscape, reviews the previous year's assumptions, and compares FIA's current thinking with that of other industry thought leaders
 - ✓ FIA gathers survey data of the risk/return assumptions from over 20 investment firms
 - ✓ Standing assumptions are either verified or updated
 - ✓ Assumptions are developed for both a **full market cycle** outlook (7-10 year) and a **long term** outlook (20 year)
- **Correlations** (how asset classes behave in reference to one another) also significantly impact asset allocation analysis.
 - ✓ Correlation information is historical in nature (rather than forward-looking)
- The industry trend has been to lower **actuarial investment return assumptions** based on lower capital market expectations. Given the current market environment, full market cycle (7-10 year) return assumptions are lower than long term (20 year) assumptions.

Market Review

Despite nine years of economic expansion, evidence is accumulating to suggest that we may be entering the later stages of the current business cycle. While the conditions that have historically precipitated an outright recession are absent, somewhat elevated risk asset valuations, rising interest rates, and exceedingly tight labor markets provide additional clues that this cycle is most aptly described as "later stage."

Trade policy continues to weigh upon investor psyche with the U.S./China saga entering a somewhat more tumultuous stage this quarter. The U.S. imposed tariffs on an additional \$200 billion of Chinese products, widening the rift further. China retaliated with an additional \$60 billion and initially rejected an upcoming meeting with the U.S. regarding trade discussions.

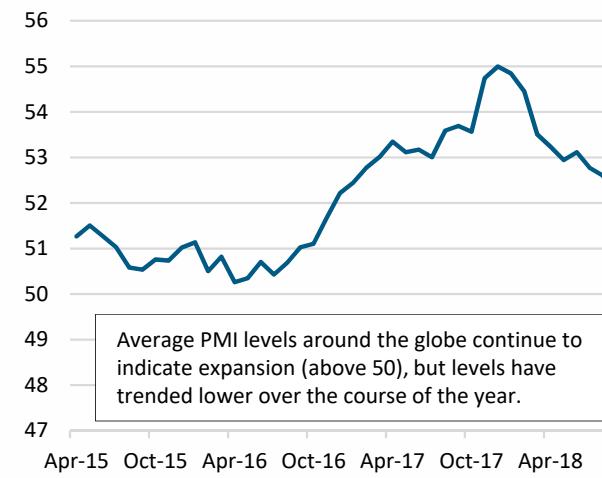

U.S. equity markets continued to decouple from their international counterparts, as the aforementioned trade tensions between the U.S. and China, fears of a slowdown in China, mixed macroeconomic data elsewhere overseas, and a resilient U.S. dollar drove a wedge between U.S. and non-U.S. markets. **Growth outpaced value by a wide margin across the capitalization spectrum**. Growth companies continued to benefit from robust earnings and generally favorable investor sentiment.

International equity markets, while positive, were unable to keep pace with the U.S., with global trade tensions, inconsistent macroeconomic data, U.S. dollar resiliency, and elevated geopolitical concerns constraining foreign equity returns.

Rates continued to climb higher during the quarter, putting negative pressure on bond prices; however, tightening credit spreads and higher coupons helped offset the negative interest rate impact, resulting in **broadly flat performance for fixed income markets**. The Fed raised their target rate an additional 25 basis points in September (2% - 2.25%), making this the central bank's third increase of the year, with one more increase likely slated for December.

Commodity prices eased as continued strength in the energy sector was unable to offset weakness elsewhere. Persistent strength in the U.S. dollar weighed on the group broadly. Oil prices reached multi-year highs, as looming U.S. sanctions on Iranian oil exports heightened concerns on an already tightening supply backdrop.

Equity & Fixed Income Review

U.S. Equity Size and Style Returns

A strong domestic economy coupled with sound corporate fundamentals continued to provide support for U.S. equities. Large cap stocks regained ground relative to their small cap counterparts. Growth stocks continued to widen their margin over value as health care and information technology stocks, which are large portions of the growth benchmarks, were among the best performing areas of the domestic equity market.

International Equity Size and Region Returns (USD)

QTR			1-Year

International equity markets were mixed as developed areas generally produced modest positive returns, while emerging regions continued their decline. Uncertainty around the impact of trade policy, concerns of a slowdown in China, and elevated geopolitical angst pressured overseas markets. Foreign exchange weighed further on results for the U.S.-based investor as the U.S. dollar strengthened against most major currencies.

Fixed Income Term and Quality Returns (USD)

Interest rates continued their march higher, which again served as a headwind for fixed income markets. Longer duration bonds largely underperformed shorter duration securities. Yields on the short end of the curve have risen to levels that have more than offset the negative price movement resulting from higher interest rates. Spread sectors fared better than governments with both investment grade and high yield corporate bonds producing positive returns.

Market Viewpoints

Asset Allocation			Rationale
Fixed Income	Neutral	Equity	The maturation of the economic cycle in the U.S., unsettled conditions overseas, and the increasingly competitive profile offered up by bonds by virtue of the movement up in interest rates (and the potentially dampening effect higher rates can present to corporate profitability) inform our preference for neutrality.
Domestic	Neutral	International	Although many valuation metrics continue to tilt in favor of the international equity markets, "headline" risk abounds (Brexit challenges, U.S./China trade skirmish). These conditions, coupled with macroeconomic headwinds on persistent display overseas (inconsistent economic data in Europe and a slowdown in China), extinguish these valuation advantages in the near-term.
Domestic Large Cap	Neutral	Domestic Small Cap	Relative valuations between capitalizations currently approximate historical norms with no particular advantage accruing to either market segment.
Domestic Value	Neutral	Domestic Growth	Value equities continue to possess a valuation advantage over their growth counterparts and do so with the added recognition that a late cycle, higher interest rate environment could serve as a mean-reverting catalyst in favor of the value style.
Int'l Developed	Neutral	Emerging Mkts	Valuation advantages remain somewhat pronounced in favor of emerging markets, but an economic slowdown in China, well-publicized currency challenges in the likes of Argentina and Turkey precipitated, in large part, by a resilient U.S. dollar, and an uneasy commodity complex dampen our near-term view of the emerging markets.
Fixed Income			
Treasuries	Neutral	Credit	Credit spreads remain reasonably well-behaved but comparatively tight and, while supported by durable U.S. economic fundamentals, profile with increasing corporate leverage/waning credit quality in an aging economic recovery.
Short Duration	Neutral	Long Duration	The recently accelerated pace toward higher interest rates has begun to alter the risk/reward profile in favor of a longer duration stance, but our zeal for this action is immediately tempered by an expectation that the strong domestic economy and an unwavering Fed may serve as the basis for rates to move even higher.

These viewpoints represent FIA's general assessment of the highlighted capital markets comparisons over the next 18 months. These opinions are subject to modification as conditions in the markets or forecasting periods change. Clients should utilize these rankings in conjunction with other considerations that may be relevant to their particular circumstances.

Investment Statistics – Descriptions

Statistic	Description
Active Return	Arithmetic difference between the manager's return and the benchmark return over a specified period.
Excess Return	Arithmetic difference between the manager's return and the risk-free return over a specified period.
Standard Deviation	Represents the degree of variation, or dispersion, of a portfolio's return in relation to its mean return. It is a measure of volatility or investment risk.
Downside Risk	A measure of the standard deviation, or volatility, of a portfolio's negative returns in relation to the mean of the negative returns over a specified period. The higher the figure, the riskier the portfolio in negative performance environments.
Sharpe Ratio	Represents the excess return over the risk-free return divided by the standard deviation of the portfolio's return. The ratio shows how well a portfolio performs versus a risk-free investment. The higher the value, the better the portfolio's historical risk-adjusted performance.
Tracking Error	A measure of the standard deviation of a portfolio's excess return over the return of appropriate market benchmark. Tracking error measures how closely a portfolio follows or tracks the index to which it is benchmarked.
Information Ratio	A measure of a portfolio's active return over its benchmark divided by the tracking error. A higher ratio indicates a manager's ability to consistently add active return relative to a benchmark.
Beta	A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of a portfolio's non-diversifiable or systematic risk. A beta of 1.0 implies a portfolio is perfectly correlated to the market.
Alpha	A measure of the portfolio's value added relative to a benchmark, given its level of systematic risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market, or a portfolio's non-systematic return.
Consistency	Also known as batting average, the percentage of quarters that a portfolio achieved a rate of return higher than that of its benchmark. The higher the consistency figure, the more value a manager has contributed to the portfolio's active performance.
R-Squared	Also known as the coefficient of determination, R-Squared (R^2) represents the percentage of a portfolio's performance explained by the behavior of the appropriate benchmark. A high R^2 means a higher correlation of the portfolio's performance to that of the appropriate benchmark.
Up Market Capture	The ratio of a portfolio's average return over the benchmark during periods of positive benchmark return. Higher values indicate better performance in positive markets compared to the benchmark.
Down Market Capture	The ratio of a portfolio's average return over the benchmark during periods of negative benchmark return. Lower values indicate better performance (and better protection of capital) in down markets compared to the benchmark.
Style Map	Using returns-based style analysis, the style map gauges the adherence of a portfolio to its style mandate. The trend of the style plots identifies style drift, or lack thereof.
Private Equity Investments	
Internal Rate of Return (IRR)	An annualized money weighted return used primarily to measure performance of private equity investments. It represents the discount rate that makes the present value of the since inception paid-in capital and distributions associated with an investment equal to zero.
Investment Multiple (TVPI)	Also known as the total value paid-in capital. Multiple is calculated by dividing the fund's cumulative distributions and net asset value by the paid-in capital. The TVPI shows an investor the fund's total value as a multiple of its cost basis since inception.
Realization Multiple (DPI)	Also known as the distributions to paid-in capital (DPI) multiple. This is calculated by dividing the cumulative distributions by paid-in capital. It represents how much of an investor's invested capital has been returned to investors. A fund has broken even when multiple is greater than 1.0.
RVPI Multiple (RVPI)	Calculated by dividing residual value, or net asset value, by paid-in capital including fees paid and other expenses incurred. It measures how much of the fund's return is unrealized and dependent on the market value of its investments.
PIC Multiple (PIC)	Calculated by dividing paid-in capital by committed capital. This ratio allows a potential investor to see the percentage of a fund's committed capital that has been drawn down to date.

Re: Permanent Single Agreement (ED-099) to Participate in the Child Nutrition Programs

The United States Department of Agriculture (USDA), through the Connecticut State Department of Education (CSDE), is requiring each school food authority (SFA) with a current single permanent agreement in place to administer any combination of the USDA Child Nutrition Programs (CNPs) to sign an updated agreement between the SFA, CSDE and USDA.

Currently, Amity has a permanent agreement with the USDA to participate in the National School Lunch Program (NSLP) at all schools, and the School Breakfast Program (SBP) at the high school only. The new Agreement is more robust in its language to outline the responsibilities of both the CSDE and the SFA as they pertain to each CNP. The new agreement does not change any responsibilities of Amity or any operations of the School Nutrition Program.

To continue participation in the National School Lunch Program and the School Breakfast Program, the Board of Education must authorize the Superintendent, Director of Finance and Administration, and the Board Secretary to sign the updated agreement. I have checked with the CSDE and they have advised me that, to avoid duplicate paperwork, the board can authorize the incoming Superintendent to sign the form when she starts her service.

Amity Finance Committee:

Motion to recommend to the Amity Board of Education to authorize incoming Superintendent Dr. Jennifer Byars, Director of Finance and Administration Theresa Lumas, and Board of Education Secretary Sheila McCreven to sign the updated permanent single agreement (ED-099) to continue participation in the Child Nutrition Programs.

Amity Board of Education:

Motion by the Amity Board of Education to authorize incoming Superintendent Dr. Jennifer Byars, Director of Finance and Administration Theresa Lumas, and Board of Education Secretary Sheila McCreven to sign the updated permanent single agreement (ED-099) to continue participation in the Child Nutrition Programs.

The budget assumes there will not be a Load Shed credit.

The budget for propane is \$2,415. The forecast is these charges will be on budget.

The budget for water is \$44,000. The forecast is these charges will be on budget.

Sewer costs are budgeted at \$40,000. The forecast projects this usage will be under budget, **\$18,911 FAV**. Jim Saisa negotiated to have the meter on the fuel cell reduced since all the waste water does not inject into the sewer system, \$10,840 FAV and remaining is reduced water usage from previous year.

DEGREE DAYS

There are 195 degree days to date compared to 78 last year at this time.

APPENDIX A

COST SAVINGS AND EFFICIENCIES FOR FISCAL YEAR 2018--2019

TOTAL ANNUAL SAVINGS TO-DATE OF: \$28,586

\$13,946 Cable Advisory Grant: One of the high school teachers, Jeremy Iverson, applied for and received a grant from Cable Advisory Grant. The grant is to be used to purchase production equipment for the film courses and production room. This reduces the amounts that would be funded through the general fund.

\$10,840 Meter Rate: Jim Saisa negotiated with a lower rate for one of the sewer meters for the fuel cell. The fuel cell does not inject water into the sewer system and the meter charge was adjusted.

\$3,800 Science Textbooks: Enrollment in science course is higher than budgeted and more textbooks were needed. Mr. Amato, the Science Department Chairperson, negotiated with the textbook vendor for complimentary copies to supplement our order.

APPENDIX B

MONTHLY FORECASTS: PURPOSE, METHODOLOGY, HISTORICAL PURPOSE & METHODOLOGY:

A forecast is a prediction or estimate of future events and trends. **It is only as good as the data available and the assumptions used.** We use current information and past history.

There are many factors, which can significantly impact expenditures, both positively and negatively (e.g., staff turnover, vacancies and leaves-of absence; medical and dental insurance claims when self-insured; special education expenditures; major facility repairs; snow removal).

To illustrate, a special education student could move into the District in mid-year and the cost impact could be over \$100,000 and/or we could have a ‘bad claims year’ and wipe out the Self Insurance Reserve Fund and need other funds to cover claims of current employees and retirees. If we do not have available funds to cover these and other potential shortfalls, the necessity to seek additional funding from the public would be our only option (as only the towns have a fund balance from prior years available to use in the case of an emergency).

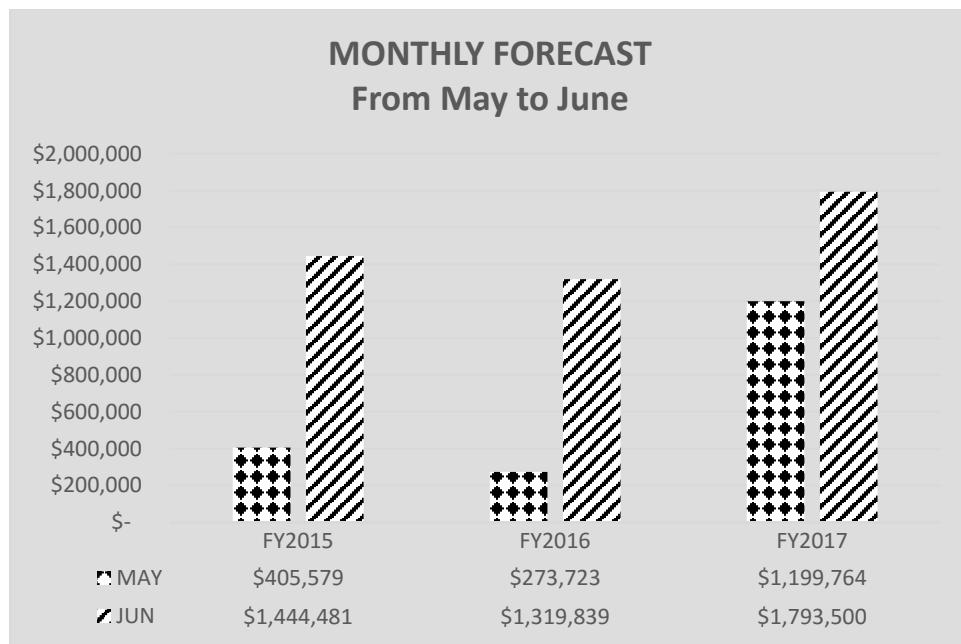

Revenues can be most impacted by decisions made at the State level for Special Education and Transportation grants. We have seen the reimbursement rate change in mid-year.

Prudent financial management is necessary. We need to be sure the total expenditures budget is never overspent (and may need to be underspent if revenues are below budget because total expenditures cannot exceed total revenues). It is imperative we ‘hold back’ on spending any of the Contingency Account until it is absolutely necessary or we are close to yearend. The Superintendent of Schools and Director of Finance and Administration review and approve or deny all purchase orders. We are careful to make sure funds are only spent when necessary and not just because ‘it is in the budget’. We are constantly faced with the ‘what-ifs’ of over expenditures in certain accounts. We need to be sure there are sufficient funds available. As a result, the fund balance has been larger towards the end of the fiscal year.

Furthermore, the monthly forecasts are based on the information available. We have had large, unexpected or highly unpredictable events at the end of the fiscal year (mostly of a positive nature), which have significantly change the forecast from May to June.

HISTORICAL:

The chart below depicts the yearend balance projected in May and June of each of the past three fiscal years.

The major contributors of the significant change from the May to June forecasts are detailed below.

FY2015:

The projected fund balance was \$1,444,481. The monthly forecast for May 2015 projected a fund balance of \$405,579, or **\$1,038,902 higher than the prior month's forecast**. The major reasons for the significant increase in the yearend fund balance from one month to the next month were, as follows:

- **\$137,115:** Certified and classified salaries were lower than forecasted. It is not until the end of the fiscal year when we know the actual expenditures for coverages, substitutes, leaves of absences, overtime, and pay docks. We use conservative estimates in the forecasts based on past history.
- **\$153,315:** Special education transportation and tuition expenditures were lower than forecasted. The May forecast included the possible costs due to two families that were beginning to proceed to due process. No expenditures were incurred in this fiscal year.

- **\$503,754:** Medical & dental claims were lower than expected. Since we are self-insured, actual claims are not known until the end of the fiscal year. Based on actual claims, we returned most of these funds to the member towns.
- **\$136,270:** As part of the yearend processing, unspent encumbrances are eliminated.
- **\$41,162:** Final grant payments for Special Education and Transportation are not known until the end of the fiscal year.

FY2016:

The audited fund balance is \$1,319,839. The monthly forecast for May 2016 projected a fund balance of \$273,723 which included \$427,713 transferred into Capital Reserve and a debt of \$145,086 owed to the State. The change is **\$473,344 higher than the prior month's forecast**. The major reasons for the significant increase in the yearend fund balance from one month to the next month were, as follows:

- **\$237,904:** Certified and classified salaries were lower than forecasted. It is not until the end of the fiscal year when we know the actual expenditures for coverages, substitutes, leaves of absences, overtime, and pay docks. We use conservative estimates in the forecasts based on past history.
- **\$107,099:** Purchased services were lower than forecasted. Athletics held fewer home contests, did not have a need for assistant coaches in a few middle school sports and cheerleading did not field a squad. Intern were fewer than budgeted. Less than anticipated need for psychiatric consults and other consultants at PPTs.
- **\$85,857:** Final grant payments for Special Education and Transportation are not known until the end of the fiscal year. The reimbursement rate was 77.63% which is higher than the budgeted rate of 75%. The prior year adjustment was positive as were the changes in student placements.

FY2017:

The audited fund balance for 2016-2017 is \$1,793,498. The monthly forecast for May projected a fund balance of \$1,199,764, which included \$345,000 for Capital Reserve. The change is \$593,736 higher than the prior month's forecast.

- **\$231,098:** Certified and classified salaries were lower than forecasted. It is not until the end of the fiscal year when we know the actual expenditures for coverages, substitutes, leaves of absences, overtime, and pay docks. We use conservative estimates in the forecasts based on past history.
- **\$129,651:** Purchased services were lower than forecasted. Athletics held fewer home contests, did not have a need for assistant coaches in a few middle school

sports and cheerleading did not field a squad. Interns were fewer than budgeted. Less than anticipated need for psychiatric consults and other consultants at PPTs. Transportation for field trips, athletics contests, and special education were lowered than expected.

- **\$76,592:** Supply accounts were under budget. These accounts include general instructional supplies, texts, library materials, transportation and maintenance supplies, and repair and maintenance accounts. Staff monitor budgets closely during the year and spend very conservatively. The staff does not attempt to “zero out” accounts but purchase what is needed at the best possible price.
- **\$54,302:** Utilities expenses were lower than anticipated. Electricity usage was lower than forecasted. The final invoice comes in July and the cooler temperatures saved on air conditioning costs. Fuel for bus drivers was not fully expended. Bus drivers have until June 30th to take fuel and the towns bill in the next 4 -6 weeks. Not all the fuel was taken though the forecast assumed all fuel would be used.

APPENDIX C

RECAP OF 2015-2016

Return Unspent Fund Balance:

The cancellation of 2014-2015 encumbrances of \$1,035 will be returned to the Member Towns. We encumber funds for goods and services received by June 30th but not yet billed. In some cases, the estimated amount encumbered varies from the actual invoice (e.g., utility bill; water bill) and we do not need to spend the entire encumbrance. Once the audit is final for 2015-2016, the funds will be returned.

Bethany	\$ 215
Orange	\$ 509

Total	\$1,035

The audited fund balance for 2015-2016 is \$1,319,839. The Amity Board of Education previously voted to designate \$427,713 for Capital Improvement Projects. There are two other funding requests for discussion at the August 8, 2016 meetings of the Amity Finance Committee and the Amity Board of Education meetings.

FINANCIAL MANAGEMENT: \$ 318,642

Our efforts to foster a District culture of finding cost savings and efficiencies has been successful producing savings of \$136,911. Utilities for electricity, heating oil and natural gas were below budget due to many conservation efforts and price negotiations.

SPECIAL EDUCATION (NET) \$ 350,967

These accounts are extremely difficult to forecast. As examples, special need students can be hospitalized; move into the district or leave the district at any time; withdraw from Amity and enroll in Adult Education. Several students who were budgeted to be outplaced were not for a number of reasons. Any one of these events can have a significant impact, positive or negative, on the District's special education expenditures. The State reimbursement rate fluctuates throughout the year. The budget forecasted 75% reimbursement rate and the final rate was 77.63%.

OTHER: \$ 650,230

\$395,748: "Turnover savings" from replacing teachers and other staff who retired or resigned is over budget and savings from unpaid leaves-of-absence. Athletic salaries were down from unfilled coaching positions at the middle school including cheerleading and several assistant coaching positions. Teacher coverages, summer work costs, substitute costs, degree changes and homebound services were less than anticipated.

\$30,315: The bid price for workers' compensation insurance premium was under budget. The payroll audit premium was below budget.

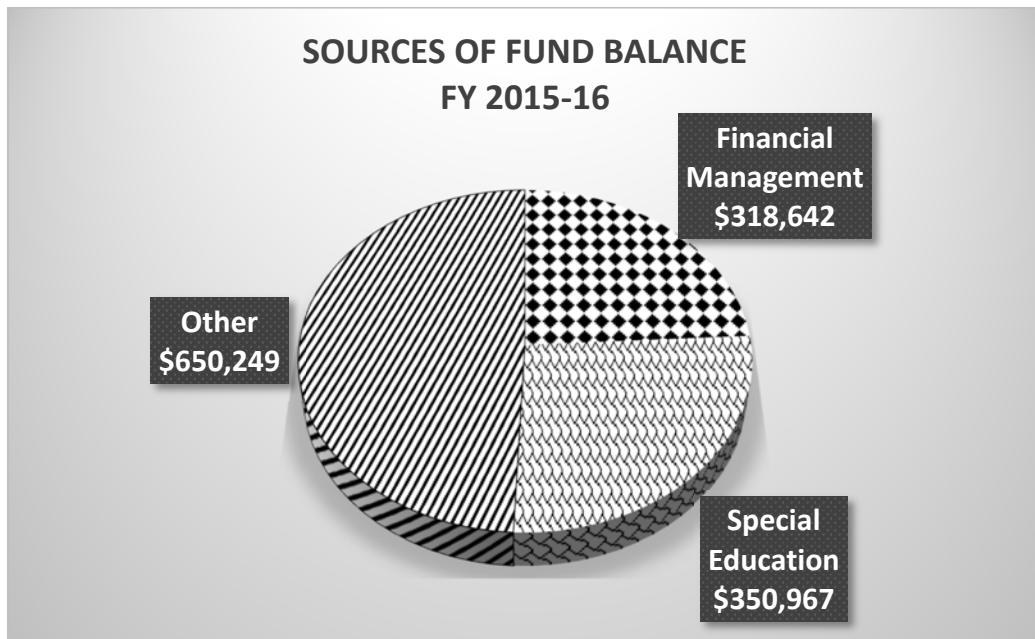

\$107,099: Purchased services costs were lower due to a number of factors. There were less interns than anticipated. Fewer home athletic contests at the high school which required

fewer officials, monitors, and scorekeepers; and less than anticipated need for psychiatric consults, professional's attendance at PPTs and behavior specialists' services.

\$62,385: The bid for the stone coping repair project at Amity Regional High School was under budget.

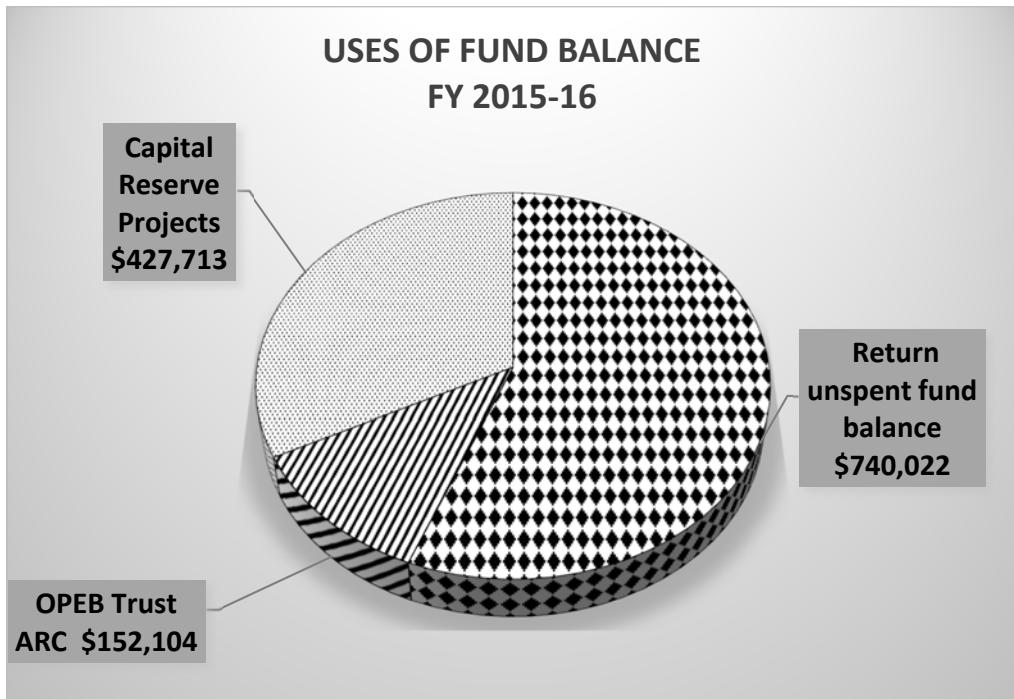

\$42,438: Transportation costs were less for athletics and less diesel fuel was used for all bus services than anticipated.

The primary sources of the fund balance are shown graphically below:

1. **\$740,022** – Return of unspent fund balance pending audit presentation
2. **\$152,104** - Designated for the 2015-2016 OPEB Trust ARC
3. **\$427,713** -Transferred into the Reserve Fund for Capital and Nonrecurring Expenses for a variety of projects. The projects include a lighting retrofit, replacing custodial equipment, renovating gym bleachers, replacing stairwell doors, replacing flooring and drinking fountains.

FINANCIAL MANAGEMENT: **\$ 246,520**

Our efforts to foster a District culture of finding cost savings and efficiencies has been successful producing savings of \$55,152. Utilities for electricity, heating oil and natural gas were below budget by \$191,368 due to many conservation efforts and price negotiations.

SPECIAL EDUCATION (NET) **\$ 477,890**

These accounts are extremely difficult to forecast. As examples, special need students can be hospitalized; move into the district or leave the district at any time; withdraw from Amity and enroll in Adult Education. Several students who were budgeted to be outplaced were not for a number of reasons. Some transportation needs were coordinated with the elementary districts to reduce the number of singletons on busses for outplacements. Any one of these events can have a significant impact, positive or negative, on the District's special education expenditures. The State reimbursement rate fluctuates throughout the year. Expenses were down \$790,238 which reduced revenue by \$477,890. The budget forecasted 70% reimbursement rate and the final rate was 76.9%.

SALARIES, MEDICAL, PURCHASED SERVICES (OTHER): **\$ 756,654**

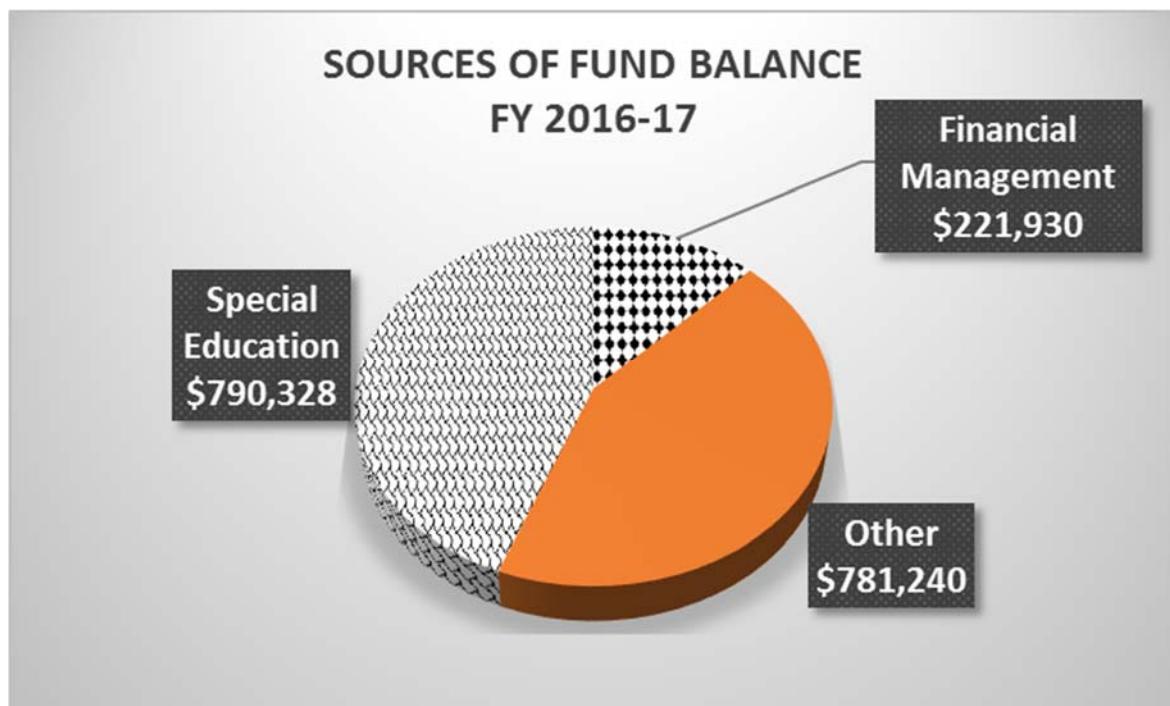

\$230,437 SALARIES (OTHER): "Turnover savings" from replacing teachers and other staff who retired or resigned is over budget and savings from unpaid leaves-of-absence. These accounts are extremely difficult to forecast. As examples, special need students can be hospitalized; move into the district or leave the district at any time; withdraw from Amity and enroll in Adult Education. Some transportation needs were coordinated with the elementary districts to reduce the number of singletons on busses for outplacements. The Director of Pupil Services has been successful in establishing suitable programs for students within the District and a number of students have returned from outplacement.

\$1,395,839 MEDICAL (OTHER): The net balance of the medical account was under budget. Claims and fees were much lower than budgeted, only costing 72% of expected

claims. The savings was offset by other components of the account including employer contributions to HSA accounts, retiree payments, and employee co-share contributions.

\$29,913 FACILITIES (OTHER): The Director of Facilities manages projects and supplies in a very conservative manner. Many projects were completed in-house including tuck-point repair of the field house, concrete sidewalk patches and step repair, and electrical repairs.

Re: Budget Transfers over \$3,000 - **Fiscal Year 2018-20119**
Date: November 2, 2018

I recommend the Amity Finance Committee and Amity Board of Education approve the following budget transfer request(s):

Facilities:

Mr. Saisa has requested a budget transfer to cover cost to install a domestic hot water pipe. The domestic hot water pipe that runs underground from the boiler room to the science wing developed a leak. We initiated an emergency repair that involved running a new line above ground complete with insulation and heat trace to prevent freezing. We utilized the same contractor that did the heating line repair under similar circumstances last year. The cost is \$23,300.

I am requesting the funds be transferred from the District improvement/ facilities contingency account to the high school building repair account.

For the Amity Finance Committee:

Recommend the Amity Board of Education approve the following budget transfer to cover the installation of the new domestic hot water line.

For the Amity Board of Education:

Move to approve the following budget transfer to cover the installation of the new domestic hot water line.

ACCOUNT NUMBER	ACCOUNT NAME	FROM	TO
05-14-2600-5715	Improvements to Bldgs/Contingency	\$23,300	
03-14-2600-5420	Repairs, Maintenance		\$23,300
