3. Textbook forecast (attachment)

4. Textbook inventory (attachment)

Items #3 and #4 were discussed together). Dr. McPadden presented the 5-year textbook forecast and first draft of the current textbook inventory to the Committee members. These will be used for planning purposes and to balance the costs for each year more evenly through 2022. The forecast is also helpful when planning for aligning the curriculum to the coming new State standards.

There was lengthy discussion regarding the forecast; digital resources versus printed text; additional information that should be included on the textbook inventory, i.e., quantity of textbooks and cross-referencing of the documents as well as future course offerings and textbooks needed.

5. Aesop and Veritime substitute management systems

Ms. Lumas explained the function of the two pieces of software and how they would work together. This was presented at the last Finance and Board of Education meetings and approved by the Finance Committee but sent to Curriculum Committee by the Board for further review. Ms. Lumas detailed the time and costs savings that would be realized by purchasing and implementing the software packages, including: expanded substitute pool; using fewer substitutes through Kelley Services resulting in cost savings; make the process more efficient for substitutes and to better track hourly employees as well as sick time, personal time and other time off.

There was discussion and questions about the two programs by the Committee

Motion by Mr. Hurley to recommend the purchase of Veritime software to the Board of Education at a cost of \$7,000.
