August 2013

Dear High School Staff:

Federal and state statutes require that we notify staff on an annual basis about the existence and location of our Asbestos Management Plan for Amity Regional High School. Please be advised that this comprehensive plan is available in the High School Principal's office located at Amity Regional High School, 25 Newton Road, Woodbridge.

In preparation for the building project, we conducted an inspection to ensure that any asbestos containing building materials in the areas of the school that were to undergo renovation or demolition were known. That inspection found asbestos-containing building materials in the roof flashing of the auditorium. This structure has since been demolished and has been replaced with a brand new auditorium as part of the construction project. No asbestos-containing building materials were used in the construction renovation project.

In addition to the Asbestos Management Plan housed in the High School Principal's office, the Director of Facilities maintains a copy of this plan at the District Offices also located at 25 Newton Road in Woodbridge.

Very truly yours,

A handwritten signature in black ink that reads "Michael R. Nast".

Mr. Michael R. Nast.
Interim Superintendent of Schools
